Education

University of South Carolina-B.S. in Computer Science

Expected graduation May 2027

Academic Achievements

President's List (4.0 GPA)-USC (Every Semester Attended), selected by professor to have coursework and papers used as exemplary models for future students.

Experience

Internship at Midlands Technical College

Columbia, SC June 2025 – August 2025

- Assisted Network team in solving various problems such as reconfiguring a switch, granting access to faculty and staff as needed, and resolving camera issues.
- Learned installation of different network devices including but not limited to cameras, access points, and switches.
- Collaborated with team members to troubleshoot technical issues and implement effective network solutions.

2D Game Engine (Java) Independent Project

Completed: July 2025

- Developed a 2D Java engine with entity, rendering, input, and collision systems.
- Implemented animation, camera tracking, and performance optimizations.
- Expanded knowledge of engine design and Java through independent projects.

Password Manager (C#) Independent Project

Completed: August 2025

- Implemented input validation for strong password rules and simulated encrypted local storage.
- Utilized prompt-based AI coding to accelerate development and improve implementation efficiency.
- Currently expanding to include true encryption, password generation, and GUI.

Leadership Experience

Led kitchen staff and class project teams, coordinating tasks and meeting goals efficiently.

Technical Skills

C++, C#, Java, Python, Linux, algorithms, data structures.

Languages

Fluent in English and Spanish.
